On Saturday, Feb. 21, 2015, Phil Lund, a congregational consultant from the UUA MidAmerica Region, presented important and relevant information about trends in the liberal religious landscape. Topics included what is currently bringing people to UU congregations and the marked generational differences in attitudes and behavior among individuals and families seeking religious communities. Phil presented briefly from John Roberto's 21st Century Faith Formation trends related to religion, technology and society and followed with bullet points and summaries of Carey Nieuwhof's 12 Cultural Trends Church Leaders Can't Ignore (But Might) and Thom Rainer's 15 Trends for Churches in 2015, Parts 1 & 2. Included were Phil's interpretations of those points and how they can inform UU congregations. Recordings of his presentation are available in mp3 format. After his presentation, a "fish bowl" conversation was conducted to hear the perspectives of some of UFL's newer members about what attracted them to UFL, with longer term members invited to jump in one at a time.
